Yannick Querrien  
*Responsable systèmes d'information*  
Crédit Agricole CIB  
Montrouge (92), Saint Quentin en  
Yvelines (78) - France

Dear M. Querrien,

I am a first year Student in a Computer Science Engineering School. I am looking for a full-time internship this summer. Recently, I saw your advert on jobs.ca-cib.com for internship in London. I will be available from 1st of July 2022 to August 31, 2022.

I have advanced coding skills, made a lot of personals and school projects. Also, I learned about project management and about the company's structure. Likewise, I am very excited and motivated to discover new skills, new people and to share my knowledge.

Furthermore, I am a quick-learner, not afraid of difficulties and can overcome stress and pressure. But after all, I am a passionate. I would be happy to apply all my knowledge and experience for a big corporation such as Crédit Agricole.

Crédit Agricole is a world-famous Bank known for its proximity to customers and businesses. Working for you, will be an honor. This internship is exactly what I was looking for. I will be very happy to join your team. My participation would be as useful to me as to Crédit Agricole.

Thanks for your concern. For a greater presentation, feel free to contact me. I appreciate your time and consideration.

Sincerely,

*Mickael Bobovitch*
